Activity based

Project 1 Report on

Application Security

Submitted to Vishwakarma University, Pune

Under the Initiative of

Contemporary Curriculum, Pedagogy, and Practice (C2P2)

By

ATHARVA SHEVATE

SRN No : 202201727

Roll No : 02

Div : E

Second Year Engineering

**Department of Computer Engineering Faculty
of Science and Technology**

Application Security

Academic Year

2023-2024

Project Statement:

(PS, Introduction, Objectives)

Vishwakarma University needs to establish server-side input validation that includes both whitelisting and blacklisting approaches, alongside effective session management, to boost security measures, avert the intake of unauthorized data, reduce vulnerabilities, and guarantee the integrity of its web application functions

Design (Usecase Model, ER Model, DFDs)

Implementation:

(Code, with justification)

Application Security

Conclusion :

Conclusion: Implementing server-side input validation incorporating both whitelisting and blacklisting techniques, coupled with robust session management, is imperative for Vishwakarma University to enhance security measures, prevent the acceptance of unauthorized data, mitigate vulnerabilities, and ensure the integrity of its web application functionalities. By adopting these measures, the university can significantly bolster its defenses against potential threats and safeguard sensitive information effectively.
